

# NI LabVIEW for Education

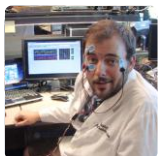

Science & Engineering They Can Get Into

**5** Ways NI LabVIEW for Education works in the classroom.

NI LabVIEW software, together with popular classroom hardware, creates a fully integrated technology platform for showing students real world lab experiences.

Designed by engineers at National Instruments.

Interfaces with popular classroom hardware.

Built on the software used in universities and industry.

## 1 See your lessons on the screen.

LabVIEW is Mission Control for your engineering and science lessons.

## 2 Powerful tools the pros use.

Developed for working engineers and university researchers.

## 3 Teach how they think.

They just get it. It's engineering for the point-and-click generation.

## 4 Connect all the concepts.

Science. Technology. Engineering. Math. Or all of the above.

## 5 Your unlimited teaching canvas.

We haven't seen the best LabVIEW lesson yet. That's your job.

## Teach outside the box, right out of the box.

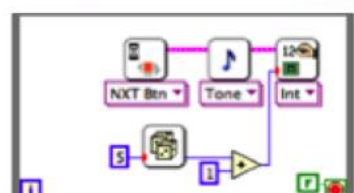

The Infinity Project used LabVIEW to create engaging and effective curriculum.

## Support and inspiration. Only a click away.

Discover K12Lab.com for support, classroom ideas and full lesson plans you can start using today.

# How Will You Teach with NI LabVIEW?

<p>7th - 12th </p>  <p><b>Gravity Simulation</b></p> <p><b>PICK</b></p>	<p>9th - 12th </p>  <p><b>Text Messenger</b></p> <p><b>PICK</b></p>	<p>11th, 12th </p>  <p><b>Connecting Sound, Music &amp; Math with Harmonics</b></p> <p><b>PICK</b></p>
